No Roses in the Cherokee Strip.

From the Hutchinson News.

The indications are that most of the boomers now waiting to go upon the Cherokee strip next Saturday will be sadly disappointed. Too many of them expect to find rich farms with little or no exertion save that of the first run. They do not take into account the fact that the Indians allowed allottments in the strip have taken up the choicest portions of the land; that water scarce, and that a winter upon a barren, sandy quarter section of land in a new ountry, where home comforts are unknown, is anything but a cheerful prospect. They may now be buoved up by expectations, but when it is all over and he stern reality of cold hard facts stare them in the face, many a "stripper" will wish himself back in "God's country."

STATES OUT OF DEBT.

Elizois Is One of Them, but Municipali-ties Have Huge Financial Burdens. Five states-Iowa, Vermont, Michl-

gan, Wisconsin and Illinois-have no interest-bearing debt, and there are six or seven other states whose bonded debts are mere bagatelles. Among the number are New Jersey, Nebraska, Kentucky and California. In a current news paragraph, which contains the above information, it is said that "exclusive of the south the states of the union are generally free from debt." and that "the annual interest charge of all the states collectively is less than that of a single railroad, the Atchison, Topeka & Santa Fe." To a foreigner, or anyone else not familiar with the facts, this would convey the impression that the Americans bear an extremely light burden of debt. Such an idea would be somewhat modified, however, says the Cincinnati Times-Star. by the knowledge that the Atchison, Topeka & Santa Fe pays interest on \$560,000,000 or more, the annual interest charge exceeding \$25,000,000-almost as much as the entire interest charge of the federal government. It is true that the state debts outside of

the south are small, yet the aggregate is far from being a trifle. The southern states have a bonded indebtedness of \$114,000,000 in round numbers. The total bonded indebtedness of all the states in 1890 was \$224,000,000, on which the annual interest charge was \$10,-000,000. The total bonded debt of the states is about one-third of the na-

tional interest-bearing debt. The people of this country would have good reason to consider themselves especially blest in the matter of taxation for interest on public debts if they had nothing more to pay than the interest on the national and state bonded indebtedness. It is the local burdens that weigh heavily upon their shoulders, and, although these debts may be less onerous than those borne in other countries, they are not to be dismissed as matters of no great im-

ty and municipal indebtedness in 1890 was about \$999,000,000-nearly \$280,-000,000 more than the bonded debt of the United States. Of this vast amount about \$846,000,000 was upon municipalities and \$144,000,000 upon counties. It has been frequently said that Ohio heads the list of the states in the amount of local indebtedness. The census figures of 1890 do not confirm this assertion. The county and municipal indebtedness of Ohio in the census year was a little more than \$66,000,000. of which \$59,000,000 rested upon municipalities. Pennsylvania had \$91,000,-000 of local debts, Massachusetts \$99,- ecute his warrant the desperado 000,000 and New York \$244,000,000. If drew a pistol and fired. But it has been fast increasing for many years, and in the proceedings of the legislatures that recently adjourned there was nothing to show that the reckless disposition for heaping up local burdens
